

The Alpine Metal Tech Group is a world leader in the field of product identification and special machines for the metallurgical and the aluminium wheel industry. The Alpine Metal Tech operates globally under the leading brands NUMTEC, GEGA, MAGNEMAG, KOCH H&K, KNORR, MAKRA and SIMULATION.

# Software Developer

**Location: Regau / Austria**

## RESPONSIBILITIES

- Conceptual support and development of analytical tools for measuring machines
- Programming and project management for software packages together in a competent team
- Development of GUI based on current designs
- Design of database interfaces for managing corresponding data volumes
- Customer support during the beta phase and the preparation of a stable release phase

## REQUIREMENTS

- In addition to a completed IT training you have about 5 years' experience in software development
- Programming experience in C / C ++ and C # is advantageous
- Ideally, you are also interested in the field of app programming
- You describe yourself as enthusiastic about technology and a good team player with excellent communication skills
- Completed military service
- Experience with data analysis and databases is beneficial

## WE OFFER

- An exciting position with long-term orientation
- Broad and varied field of responsibilities, used to work independently after a profound initial instruction
- Participation in a dedicated team and the possibility of further education
- Excellent development opportunities within a global operating concern

The monthly gross salary for the above mentioned position will be at least € 3.100,00 (according to the applicable collective agreement). Your actual salary will be defined in a personal interview, depending on your qualifications and previous experience.
